The Certificate in Case Management program provides knowledge and skills relevant to the provision of case management services in a variety of health care settings. The program is designed for individuals who have a desire to help others and provide holistic support to the clients they serve. The required five (5) three (3) credit courses prepare students to sit for certification examinations.

Course Materials will be mailed to you along with a return envelope. When you complete the work, send it back for evaluation.

Financial aid may be available.

REQUIRED COURSES

SHS 328 Crisis Intervention: Provides a theoretical framework for the understanding of crises and emergencies in mental health and health care practice. A variety of crisis experiences are examined, including developmental and transitional crisis.

SHS 457 Seminar in Case Management: Adhering to requirements for certification for Certified Case Managers (CCM), focuses on the role of case managers in assessment, planning, coordination, monitoring and evaluation.

SHS 352 Social and Health Services Policy: Provides a theoretical framework for the critical analysis of current social welfare and health care policies and their effects on the provision of services.

ELECTIVES (SELECT TWO)

PLS 250 Workers Compensation: Examines the historical development, social theory, and operation of workers' compensation statutes, including compensability of injuries caused by accidents arising out of and in the course of employment, benefits payable, categories of risks, limitation of common-law rights and procedures.

HCA 459 Seminar in Managed Care: Investigates the evolution of managed care in the United States health care system, particularly focusing on efficiency and effectiveness in this approach to contemporary medical and mental health care practice

HCA 418 Mental Health Issues and the Law: Explores the jurisprudence of mental health law and the social policy upon which it is built.

SHS 358 Social and Health Services and Family Systems: Provides an understanding of the therapeutic models used to assess and work with families.

SHS 451 Geriatric Mental Health Care Management: This course offers insights and practical approaches to working with older adults who may have mental illness.
